ABSTRACT

The primary purpose of this annual directory is to list all local agencies providing free public elementary and secondary education in the United States and its outlying areas. Included are agencies that provide general or both general and specialized education, but not those that provide only specialized education. The directory does not include area vocational-technical training systems nor does it include any area school systems that provide only special education. "Local" as used here denotes those agencies closest to the actual operation of the educational programs. Where administrative services are performed for more than one school district by a common superintendent, the resulting supervisory union is listed in addition to the local school districts. The main body of the directory lists, in alphabetical order by State, the following information for each system: name of unit, mailing address, county name, grade span, number of pupils, and number of schools. Also included are summary tables showing (1) the distribution of operating local public school systems and numbers of pupils by system size; (2) the number of such systems by grade span and size, by grade span and State, and by school system size and State; and (3) the number of operating and nonoperating public school systems by State or other area. FOREWORD

As a result of reorganizations, annexations, and consolidations, the number of local public school systems in the United States decreases each year. Consolidation into larger but fewer school systems appears to offer advantages which compel smaller school systems to consolidate into larger ones, although the rate of consolidation has declined in the last 2 years.

This directory is part of the U.S. Office of Education's continuing series of education directories. We issue this publication to provide a current listing of operating local public school systems to the many agencies and organizations which deal with such public school systems. There is no other single directory source which also provides statistical data for public school systems.

A new method of producing the direc[illegible]gs—a computer-operated typeset process—was used in the printing of t[illegible]tion of *Education Directory, Public School Systems*. In future editions of the directory, the greater flexibility of this process will provide increased freedom in manipulation of the printing format; and, because of the ability to differentiate the typeface, will make the directory more readable and thus easier to use.

For their fine cooperation in updating the information contained in the Office of Education's file of local school systems, we are indebted to State education agency research and statistics personnel as well as to members of the Committee on Educational Data Systems of the Council of Chief State School Officers. Each year the preceding year's listing of school systems is sent to the State education agencies for updating. Special thanks are due to these personnel this year for the early return of data.

Roy C. Nehrt, Chief
Elementary-Secondary Surveys Branch

Dorothy M. Gilford
Assistant Commissioner
for Educational Statistics

INTRODUCTION

The primary purpose of this annual directory is to list all local agencies providing free public elementary and secondary education in the United States and its outlying areas. Included are agencies that provide general or both general and specialized education, but not those that provide only specialized education. The directory does not include area vocational-technical training systems nor does it include any area school systems that provide only special education.[1] "Local" as used here denotes those agencies closest to the actual operation of the educational programs. This may include town, district, area, county, or even State agencies (as in Hawaii and parts of Alaska).

For the convenience of users of this publication, one additional level is given in certain cases. Where administrative services are performed for more than one school district by a common superintendent, the resulting supervisory union is listed in addition to the local school districts. In the State of Nebraska the county superintendent provides administrative services to all school districts within his county that have less than seven teachers. These small districts are therefore listed as "county administered systems" under their county superintendent. In the States of Maine, Massachusetts, New Hampshire, and Vermont the local school systems are listed under the supervisory union which provides the respective district with administrative services.

Information for this directory was provided by the research and statistical staff in each State Education Agency. The instructions and form that were sent to each State are contained in the appendixes.

Except for special cases noted below, the following information is given for each system listed: name, mailing address, county, grade span, number of pupils, and number of schools.

1. Nonoperating districts (those not currently operating schools) are shown at the end of each State listing, and only the name and county are given.

---

[1] Special education as defined in State Educational Records and Reports Series: Handbook II, Revised, *Financial Accounting, Classifications and Standard Terminology for Local and State School Systems*. DHEW Publication No. (OE) 73-11800.

2. Grade span, pupil, and school data are not reported for the supervisory unions in Maine, Massachusetts, New Hampshire, and Vermont. However, this information is given for each operating school district within these supervisory unions.

3. Since all school districts in a supervisory union share the same administrative office, the address of this office is given only once for each supervisory union and applies to each school district in the union.

NOTES TO USERS OF THIS DIRECTORY

Name of Unit

- Within each State the regular operating school systems are presented first and are followed by the nonoperating districts. In those States having supervisory unions, they and their component districts are listed last.

- Where a nonoperating district is part of a supervisory union, it is placed with its union rather than with the nonoperating districts.

- Within each of the categories noted above, the sequence of entries is alphabetical and numerical according to the name of the unit.

- Information for the outlying areas of the United States is given following the alphabetical listing of States and the District of Columbia.

- In some States, the legal name of a school district may differ from the popular name by which the district is generally known. The names used here are those suggested by each State education agency as being the most appropriate identifiers of the districts in that State.

Location of Superintendent

- The information given here presents the mailing address of the administrative office for each operating school system or supervisory union.

- These place names have been reviewed and edited to conform to U.S. Postal Service recommendations as to abbreviation and spelling.

- When a school system located near a State boundary has its post office address in the adjoining State, the abbreviated name of that State is given immediately after the place name.

ZIP Code

This code should be considered an integral part of the mailing address.

County Name

County names are shown for operating and nonoperating districts and for supervisory unions. The county given for a school system is the one in which the superintendent's office is located, although some parts of the system may lie in other counties. In the listing for Alaska, election districts rather than counties are given in this column.

Coterminality of Geographical Boundaries

The reader should be aware that school system boundaries often are not coterminous with any other political boundaries. For example, the boundaries of the San Antonio Independent School District in San Antonio, TX, are not coterminous with the city limits but enclose only a portion of the city's area within the city limits. Alamo Heights Independent School District is also entirely within the city limits of San Antonio. Several more school districts cross the city limits and therefore contain areas both within and outside of the city of San Antonio. A similar situation exists in Kansas City, MO, where Kansas City 33, Center 58, North Kansas City 74, and portions of other school systems are within the city limits. Indianapolis, IN, includes all or portions of six systems. The Los Angeles Unified school system contains areas outside of the city limits of Los Angeles. The above are just a few examples of the lack of coterminality of school system boundaries with other political boundaries.

The Bureau of the Census in the 1967 Census of Governments found that 86 percent of all independent school districts and 20 percent of the dependent school systems serve areas that do not correspond directly to those of any other local governments. The noncoterminous school systems included 3,449 classed under the heading "municipal." Most of the "municipal" systems included an entire municipal area as well as some adjacent territory.

In several States, school district boundaries are always coterminous with other political boundaries. Examples are Maryland, Virginia, Alabama, Florida, West Virginia, and Nevada, with coterminous school district and either county or city boundaries.

Grade Span

These entries represent the lowest and highest grades taught in a system, from prekindergarten (PK) through grade 12. However, grades 13 and 14 do appear in a few school systems containing vocational education courses, and many operating school systems offer postgraduate (PG) courses. Where information was not available, or where a grade span designation was deemed inapplicable by the respondent, this column is left blank. It is also blank for nonoperating districts and supervisory unions.

Pupils

The figures reported here represent average daily membership (ADM) for the school year 1972–73. When this measure was not available, other pupil counts were used as follows:

1. Children living within the boundaries of nonoperating districts are counted in the systems in which they attend school.

2. Estimated fall 1973 enrollment is provided for new districts in all States where available. Where such estimates were not available, no entry appears. Fall enrollment is the number of pupils on the rolls on a specific date (usually October 1 or the nearest date thereto when enrollments have stabilized). ADM is the sum of the days present and absent of all pupils when school is in session during this period. Fall enrollment is generally about 1.5 percent higher than ADM for a given year.

3. For New York, the fall 1972 enrollment is shown.

4. Pennsylvania derived a conversion factor of 0.990 X 1972 fall enrollment equals ADM, based upon its study of data from the preceding 3 years.

5. The Vermont ADM entries do not include students sent to private schools by local school districts through tuitional agreements with the private schools.

6. The California enrollment entry is the Average Daily Attendance (ADA) for the 1972–73 school year. In California's compilation of ADA, pupils were counted as present if they had a legal excuse for absence on a given day. Therefore, the California ADA entries are roughly comparable to the ADM entries of the other States.

7. The Montana ADM entry is the fall 1971 enrollment as published in the *1971–72 Montana Education Directory*.

8. The Michigan entry is ADA that was estimated by 0.920 X fall 1972 enrollment.

9. The Massachusetts entry is the fall 1972 enrollment.

10. The Connecticut entry is the fall 1972 enrollment.

11. Idaho estimated ADM as 1.05 X 1972 ADA.

Number of Schools

Entries in this column indicate the total number of public elementary and secondary schools in each operating system. When this information was not available, for a few scattered systems in several States, no entry appears.

Comparability With Other Reports of the Office of Education

Since this publication is a directory of school systems, rather than a statistical report, primary attention has been given to the accuracy of names and locations. While the numbers of pupils and schools can be fairly reliable indicators of a school system's size, they should not be construed as official statistics of the Office of Education. Official figures in these areas can be found by State in *Statistics of Public Elementary and Secondary Day Schools, Fall 1972*, DHEW (OE) 73–11402 and by selected districts in *Statistics of Local Public School Systems, Fall 1970: Pupils and Staff*, DHEW (OE) 73–11415.

Mailing to School Systems

The following form of address is suggested for mailing to a school system:

Superintendent of Public Schools
Name of school system
City or town, State, ZIP code

RANKING BY ENROLLMENT OF SCHOOL SYSTEMS
WITH ENROLLMENT OF 10,000 AND MORE
FALL 1973

NOTE.–Asterisks are used when two or more school systems have equal enrollments, and then the highest rank number is assigned to each of these systems.

Rank	Name of unit, city, and State	Pupils 1972–73
1	New York City, Brooklyn, NY	1,123,566
2	Puerto Rico, Hato Rey, PR	726,850

APPENDIXES

A. Instructions for Completing ELSEGIS v[illegible] Part B-2, State Report of Operating and Nonoperating Local Public School Systems

B. OE Form 2350-8-1, Elementary-Secondary General Information System (ELSEGIS), Part B-2B, Supplementary Report for Newly Organized Local School Systems, School Year 1972–73

APPENDIX A

INSTRUCTIONS FOR COMPLETING ELSEGIS VI, PART B-2, STATE REPORT OF OPERATING AND NONOPERATING LOCAL PUBLIC SCHOOL SYSTEMS

COVERAGE

This survey is intended to include all local agencies providing free public elementary and secondary education in the United States and its outlying areas. Such education is considered here to be all education through grade 12. "Local" as used here denotes those agencies having direct responsibility for the education of children residing within designated geopolitical boundaries. This may include town, district, area, county, or even in some cases State agencies (as in Hawaii and parts of Alaska). Also included are public agencies providing special or vocational/technical education on a regional basis such as area vocational/technical agencies.

INSTRUCTIONS FOR UPDATING PART B-2A (THE PRIOR YEAR'S UNIVERSE)

Local school systems as reported in the fall of 1972 are listed by State, county, and name of school system on Part B-2A.

1. For routine corrections of information printed on the listing, draw a red line through the erroneous information and enter the correction in red above the line.

2. For corrections necessitated by school system consolidations, see instructions for completing Part B-2B which follow.

3. If the name of the school system as listed is not the best identifier for general purposes, please correct. However, the name must be contained within 30 characters, including spaces between words.

4. The name of the city listed should be that of the city or post office where the superintendent of schools receives mail. Maximum field length is 13 characters. Longer names should be abbreviated per the *ZIP Code Abbreviations for Use with ZIP Code*, POD Publication #59 (Rev.).

5. The ZIP code should be verified and corrected, if necessary.

6. The county name listed should identify the county where the superintendent of school's office is located, even though the school system may include area in more than one county. This name should be verified and corrected, if necessary.

7. The number of schools operated by each school system in 1972–73 is listed. The number of schools which the school system expects to operate in 1973–74 should be entered, if different from the number listed.

8. The grade span of pupils served in 1972–73 is listed. If the grade span for 1973–74 is to be changed, please enter the correction. The first two positions in the field indicate the lowest grade and the last two the highest grade. Besides grade numbers (01, 02, etc.) the symbols K for kindergarten and PK for prekindergarten have been used. If the school system enrolls postgraduate pupils (pupils who have graduated from the 12th grade, but are taking regular secondary school courses, NOT 13th or 14th graders) the symbol PG may be used for highest grade.

9. Verify or correct the OP CD (operating code) for each system according to the following code structure:

   Code 1 – Operating system. A self-contained local public school system having its own decision-making board of control, operating a school or schools providing general elementary/secondary education, including vocational/technical education.

   Code 2 – Nonoperating system. A self-contained local public school system having its own decision-making board of control which does not operate schools, but pays tuition to other operating systems for the education of children residing within its boundaries.

   Code 3 – Supervisory Union. An administrative agency which provides services to component school systems (found only in Maine, Massachusetts, New Hampshire, and Vermont).

   Code 4 – An operating system which is a component of a supervisory union.

   Code 5 – A nonoperating system which is a component of a supervisory union.

Code 6 – A public agency providing general elementary and/or secondary education not included in the above categories, such as an area vocational/technical school system, special education school system, etc., which are not considered to be local school systems as defined in Code 1. If any such school systems were listed in operating codes 1 through 5, please change the code to operating code 6. If any school systems operate within the State which are properly classified in this way and do not appear on the B-2A list, their names and complete information (except State/System Number) should be added to the end of the B-2A list.

10. The supervisory union code for component school systems is listed for those States which have supervisory unions. These codes should be verified and corrected, if necessary.

11. Enter the average daily membership for the 1972–73 school year under ADM. If not available, please estimate.

12. Enter the average daily attendance for the 1972–73 school year under ADA. If not available, please estimate.

13. Verify or correct the fiscal status code for each school system according to the following coding structure:

Code 1 – Fiscally independent. The local school board has complete control over its fiscal affairs as provided by State school laws and regulations, e.g., the budget and tax rate are not subject to review and/or change by any other governmental agency.

Code 2 – Fiscally dependent. Some other governmental agency or official, such as city council, county board of supervisors or mayor, exercises final control over such matters as the school board's budget or tax rate.

Code 3 – Fiscally independent for current expenditures, but dependent for capital outlay, debt service.

14. School board selection code should be verified or corrected according to the following coding structure:

Code 1 – School board is elected by popular vote.

Code 2 – School board is appointed by some governmental agency or official, such as city council, county board of supervisors or mayor.

Code 3 – Part of the school board is appointed and part of it is elected.

INSTRUCTIONS FOR COMPLETING PART B-2B

A Part B-2B form must be completed for each newly organized school system resulting from reorganization, consolidation, annexation, etc.

Three types of consolidations appear possible: (1) a group of school systems consolidate into a single school system; (2) a group of school systems consolidate into two or more school systems wherein one or more of the original school systems are divided as a result of the consolidation; and, (3) a single school system is divided into two or more school systems.

1. In the first situation, complete section I for the newly organized school system. Enter the correct name, even though it may be the same name as one of the systems involved in the consolidation. Enter the city/post office name, ZIP code, and county name where the superintendent's office is located. Enter the combined number of schools which the newly organized system now operates (the sum of the schools operated by the original systems minus any schools which may have been closed). Enter the grade span of pupils served, the operating code (usually "1"), and the supervisory union code if in New England. Enter the end-of-year combined ADM and ADA for the newly organized system for the 1972–73 school year. Enter the fiscal and board selection codes.

   Copy the ST/SYSTEM NUMBER, name of system, city, ZIP code, and county name from the B-2A list for each of the systems consolidated into this newly organized system into the spaces provided in Section II. *Circle the ST/SYSTEM NUMBER on the B-2A list for each such school system entered into Section II.*

2. In the second situation, two B-2B forms must be made up. Follow the instructions in paragraph 1 above for completing Section I for each of the two newly organized systems, except that the "number of schools," ADA and ADM must somehow be split out for the system(s) which were divided by the consolidation.

Follow the instructions for completing Section II above, except that the name(s) of the system(s) which were divided must appear on each of the forms for the two newly organized systems.

Circle the ST/SYSTEM NUMBER on the B-2A list for each school system entered into Section II.

3. In the third situation a B-2B form must be prepared for each newly organized school system according to the instructions given above, except that the name of the original system which was divided must be entered on Section II of each of the B-2B forms. Be sure to circle the ST/SYSTEM NUMBER on the B-2A list for the system which was divided.
